

iPad Apps | Getting Started Guide

QUALITY READING INSTRUCTION IS JUST A TAP AWAY

The new *Reading Horizons Discovery* iPad Apps increase access to the software both inside and outside of the classroom. Follow the steps below to provide student access to the apps:

STEP 1

DOWNLOAD THE APPS

NOTE: You must have access to the *Reading Horizons Discovery Software* to use the apps.

Visit the Apple Store and download the following two apps: the *Reading Horizons Discovery Clubhouse* and *Games* Apps.

Reading Horizons Discovery
Clubhouse App

Reading Horizons Discovery
Games App

System Requirements

iPad 2 or greater | iOS 8.1 or greater | internet connection

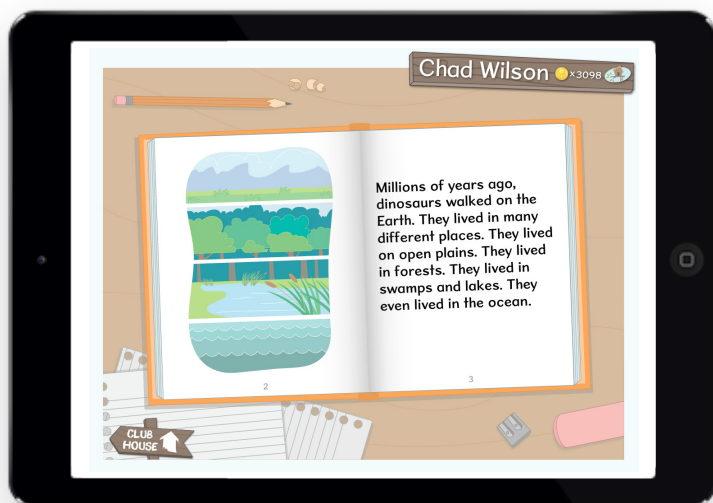

STEP 2

HAVE STUDENTS LOG INTO THE SOFTWARE

Once all of these apps have been downloaded onto an iPad, the Clubhouse is used as the main access point. Students simply use their same login credentials from the online version of the software.

STEP 3

NAVIGATE BETWEEN THE APPS

Students do not need to switch between the different apps—the Clubhouse will do that for them automatically. If students enter the software through an app besides the Clubhouse and they are not logged in, they will be prompted to log in.

NOTE: All instruction is consistent between the software and the apps. However, some of the basic functionality and features differ between the two.
